Conformio

Automate. Comply. Grow.

BECOME AND REMAIN
ISO 27001 COMPLIANT

https://advisera.com/conformio/

The only solution small to mid-sized businesses will ever need

Meet Conformio, Software-as-a-Service and your clever compliance assistant that does 70% of the work for you and puts the ISO 27001 compliance on autopilot - for a fraction of the cost.

Conformio = Automate + Comply + Grow

Automate the manual work

Conformio automates the completion of the Risk Register, Statement of Applicability, and other steps, so you'll avoid bureaucratic work that is usually associated with ISO standards.

Comply with ISO 27001

Using Conformio compliance software is the best way for your company to achieve and maintain ISO 27001 certification, without spending too much time and money.

Beginners or advanced users

Conformio helps to achieve certification for smaller companies of up to 100 employees, no prior knowledge or experience needed. Best for SaaS, IT providers, and other companies interested in information security.

QUICK TOUR OF THE CONFORMIO FEATURES

Key Conformio features that will help you save time and money while implementing ISO 27001:

Step-by-step guidance

Conformio will walk you through the implementation process step by step and explain all the necessary steps and documents. With Conformio, there is absolutely no need to hire new staff or expensive consultants, and you will meet the compliance requirements exactly like the certification auditors will expect.

Documentation

Conformio will provide you with all the mandatory policies and procedures you will need to implement and maintain ISO 27001 in one place. It will also provide automated suggestions for the key documents, so you will know which kind of information to write in them.

Automation

Conformio moves the data automatically between the Risk Register, Statement of Applicability, and other modules, and automatically adapts the implementation process, leaving only the necessary procedures based on your company's specific needs and requirements. Also, it automatically drives recurring processes like risk review, management review, and document review, and tracks your progress.

All-in-one compliance tool

Conformio is a Software-as-a-Service platform that includes everything you need to implement and maintain the standard, such as templated documents, online forms, policies, procedures, risk management, checklists with automatic reminders, and more. All of that is easily accessible through the software dashboard, making your compliance management a breeze.

ROI OF THE CONFORMIO COMPLIANCE TOOL

Accelerated implementation of ISO 27001

Implement ISO 27001 five times as fast when compared to doing it on your own without any help.

Improve your bottom line

With Conformio, there is no need to hire expensive consultants or new staff, which allows you to minimize the cost of your implementation project. Eliminating repetitive tasks also allows you to free up the staff involved in the ISO 27001 implementation and switch their focus to more strategic decisions, which in return improves business results and the company's bottom line.

SECURITY

We take the security of your data seriously and we have taken a number of measures to protect its integrity. We constantly review our security measures to ensure that they are always up to date. Our security measures apply from the security of the IT infrastructure to the security of the application.

The application is hosted on a major Cloud provider fully compliant with all major security and quality standards. Technical measures like network isolation, isolation on physical hosts, controlling network traffic, and others ensure that the IT infrastructure Conformio uses is secure.

The security of the application itself and the data it contains is ensured by a series of measures we took during the development of Conformio and in our daily operations. For example:

- The application was built with technical measures to prevent intrusion attacks.
- We use encryption not only when transferring data, but also for stored data. E.g., document names and folder names are encrypted.
- All data is regularly backed up.
- Access to servers and data is restricted to select staff members. Any access to your data must first be approved by you.
- We constantly monitor the behavior of the Conformio servers.
